Radio equipment – Conformity assessment under the R&TTE Directive

The National Telecom Agency has received a request for assessment of the radio equipment

**TT-3000S Capsat System**

based on the technical construction file issued by Thrane & Thrane A/S and their Quality Management System ISO9001, certificate no 935142 issued by Lloyd's Register Quality Assurance.

In order to declare conformity with the essential requirements, in cases where harmonised standards are not used or used partly then 1) essential radio test suites must be selected by a notified body and 2) documentation concerning the technical construction file must be submitted cf. Section 13(3) of Danish Executive Order No 236 of 30<sup>th</sup> March 2000 on Radio and Telecommunications Terminal Equipment and Electromagnetic Matters, implementing Directive 1999/5/EC.

The equipment has been tested according to TBR26 or EN 301 426 (2000-05) and declared compliant with this harmonised standard. The equipment is intended to be used on board non-SOLAS vessels. The scope of EN 301 426 (2000-05) only covers land mobile use, but a new draft EN 301 426 (2001-02) where the scope is extended to cover Maritime Mobile satellite Earth Stations not intended for distress and safety purposes, has been submitted for public enquiry.

It is the assessment of the National Telecom Agency that the declaration of conformity to EN 301 426 (2000-05) together with the contents of prEN 301 426 (2001-02) will give presumption of compliance with the essential requirements of Directive 1999/5/EC for the above mentioned equipment.

The radio equipment must only be marketed if duly marked i.e. bearing the CE marking. As the equipment is a class 1 equipment according to Annex 12, par. 1.11 in Executive Order No 236 of 30<sup>th</sup> March 2000 on Radio and Telecommunications Terminal Equipment and Electromagnetic Matters, the equipment shall not bear the class 2 identifier (alert marking), but a reference to the notified body, Identification Number 0170, shall form part of the marking.

Yours sincerely,

Jens Rahbek
