

Navi Light Sport Attachments:

The Navi Light Sport extends the hugely successful Navi Light range of portable maritime lighting products. The “sport” combines the best features of the award winning Navi Light 360 with a compact “head torch” that floats. However, the Navi Light Sport really comes into its own in terms of versatility when combined with the following amazing range of attachment systems.

STANDARD ARMBAND (INCLUDED WITH NAVI LIGHT SPORT PURCHASE):

- Comfortable and stylish armband with a plastic fitting to support the Sport light unit. The base of the armband provides a Velcro attachment to the light unit for extra stability when worn, for example, on the upper arm.
- Integral small plastic screwdriver as part of the armband gives very easy access to the batteries in the Navi Light Sport.

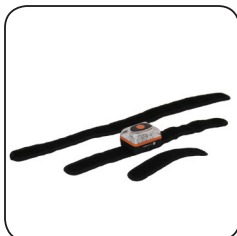

CLIP HOLDER:

- Clip attachment accepts and holds Navi Light Sport in holder with Velcro and then clips to: Straps – Clothing – Bags – thin Metal – Tents – Sheeting – etc
- Super strong clip. Multiple uses.

DOUBLE MAGNETIC HOLDER:

- Double magnetic holder converts Navi Light Sport to the award winning double magnetic Navi Light 360 degree.
- Attach to almost anything with the award winning double magnetic system
Clothing – Bags – Caps/Hats - Plastic – Metal – Poles – etc
- Operates as a single magnetic system or together as the unique Navisafe double magnetic system.

VELCRO STRAPS:

- Three different sizes of Velcro straps provide the ultimate in flexible attachment systems for the Navi Light Sport.
- The smallest size is perfect for attaching to rucksack shoulder straps, life vest straps, bag handles, paddles, etc
- The medium and large straps provide the ability to secure the Navi Light Sport to virtually any other attachment point such as boom, mast, handles, and many other items.
- The Velcro straps come in three different lengths of 16cm (small), 25cm (medium) and 48cm (large)

ARMBAND SMALL.

- The Navi Light standard armband is provided with each Navi Light Sport and is the perfect armband for most applications, however, if the Navi Light Sport is to be used for sporting events where the arms are bare and not very large then a much smaller armband can be very useful.
- This much shorter version on the Navi Light standard armband has proved popular with ladies and men's sporting events, joggers and children paddlers.
